Typst Package for Enums

Package Name: format-enum
Package Version: 0.1.0

Usage

Import the package.

```
#import "@local/format-enum:0.1.0": *
```

Use one of the following for format an enum

```
#show: format_enum_word
#show: format_enum_unicode.with(color: red.darken(45%))
#show: format_enum_diamonds.with(color: red.darken(45%))
#show: format_enum_floral_hearts.with(color: red.darken(45%))
```

Then make a enum (Bulleted List) as normal.

```
- Level 1
  - Level 2
    - Level 3
```

Word (Black only)

- Level 1
  - Level 2
    - Level 3
